Harrison Assessments Suitability

This section includes work preferences and tendencies that you have selected for this job. The score to the right of each factor shows the applicant's score as calculated for each trait.

The green, yellow or red ball in each graph indicates the degree of positive (green) or negative (yellow and red) impact that the factor is predicted to have on job performance. The ball is always inside a bar graph, which indicates the potential range of impact that the factor can have on performance. Note that the bar graph can have a different length for each factor. The lengths and positions of the bars are determined by the weightings you have given to each trait in the Job Success Formula setup.

The system checks to see if the answers were completed honestly and while paying sufficient attention. Analysis indicates there is a high likelihood (99.2%) the answers were truthful, accurately self-aware, and completed with sufficient concentration.
